THE ABR DIFFERENCE

ABR is a leading environmental services firm based in Alaska and experienced nationwide. For over 45 years, we have provided technical scientific support in wildlife, fish, aquatic, and landscape sciences, pairing scientific expertise with leading edge technologies and analysis methods to provide cost efficient environmental solutions. Our adaptable team is based in Fairbanks and Anchorage, Alaska, with remote collaboration capabilities to support clients throughout the country. We bring success to our public and private-sector clients through expert technical services and safe field operations.

PAST PERFORMANCE

ABR's integrated environmental sciences group provides expert services throughout the project life cycle. To date, most of our projects have been concentrated in the energy sector working directly for federal government agencies or providing consultation services to agencies on behalf of private clients.
