Labor Category Qualifications

Labor Category	Minimum Education and Experience	Duties and Responsibilities
Senior Scientist IV	Masters, 15 years	Supervisory-level scientist, duties of SS III, manages multiple projects with significant client interaction; project management including budgetary and work product oversight.
Senior Scientist III	Masters, 10 years	Supervisory-level scientist, duties of SS II + program manager with oversight of SS III/I; manages multiple projects with significant client interaction.
Senior Scientist II	Masters, 7 years	Professional-level scientist, designs and manages own projects, extensive client interactions; supervises RB/Tech and manages field projects; supervises/prepares contract reports.
Senior Scientist I	Masters, 5 years	Professional-level scientist with project leader responsibilities, client interactions required but usually working under supervision of field project staff, data analyses, report preparation.
Research Biologist IV	Bachelors, 10 years	Professional level, responsible for all aspects of project management except for client interaction. Under limited supervision of senior personnel responsible for study design, field implementation, data analysis and report writing.

Labor Category	Minimum Education and Experience	Duties and Responsibilities
Research Biologist III	Bachelors, 7 years	Professional level, responsible for some project management, except for client interaction. Supervised by senior personnel but may have limited field project leader tasks with increased levels of data analytical tasks and report writing.
Research Biologist II	Bachelors, 5 years	Professional level, with expanded field responsibilities, may supervise technicians in field and be responsible for field project elements; ability to work with little supervision; increased post-field responsibilities including database management, data analysis, report preparation.
Research Biologist I	Bachelors, 3 years	Field project duties under supervision of field project leader, may be assigned oversight of project elements, post-field responsibilities for data entry, data analysis, report writing as assigned.
IT Specialist III	Masters, 10 years	Expert knowledge of complex systems, expert programming skills including statistical programming; spatial analysis, text processing, database design and administration.
IT Specialist I	Bachelors, 5 years	Work with IT professionals and researchers on statistical programming; spatial analysis, text processing, database design and management.
GIS Specialist III	Bachelors, 5 years	Professional level, manages GIS Specialists I, II and workflow; high-end GIS spatial analysis, database design/management, interacts with senior scientists and clients; may be involved in report writing.
Technician IV	Bachelors, 4 years	Tech III duties + increased responsibilities and special technical support services (e.g. graphics, data entry and management, boat operator). Possible supervision of other technicians with some RB-level responsibilities. Infrequently asked to manage specific components of a project (field tasks, data summaries, draft report needs).
Contracts Manager	Bachelors, 10 years	Contracts management for projects, budget review, client/contract negotiations. Approves all contracts, subcontracts, modifications and billings. Communicate expert knowledge of contractual guidelines, GAAP, FARS, etc.

Labor Category	Minimum Education and Experience	Duties and Responsibilities
Publication Specialist II	Bachelors, 10 years	Operational Management of publication design and production; Works with Project Managers to produce professional scientific reports and supporting materials with ability to evaluate the content and structure of written material; responsible for proofreading or copy editing documents for spelling, style, and consistency; including composing or editing others' content; Extensive experience with Framemaker, InDesign, Photoshop or other Adobe design software; Coordinates and arranges project travel.
Project Management Support Specialist II	Bachelors, 5 years	Understanding of research; Act as liaison between scientists and accounting department staff, ability to interpret and communicate regulations; provide support to PI's on all facets of proposal development including writing, editing, and budgeting and on budget management and tracking including project invoicing and reporting.
Project Assistant IV	Bachelors, 4 years	Project support plus increased responsibilities under direction of Project Assistant IV or Project Management Support Specialist II; able to apply assigned client contractual guidelines.

The Service Contract Labor Standards, formerly the Service Contract Act (SCA) is applicable to this contract as it applies to the entire Multiple Award Schedule and all services provided. While no specific labor categories have been identified as being subject to SCLS due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CRF 541.300), this contract still maintains the provisions and protections for SCLS eligible labor categories. If and/or when the contractor adds SCLS labor categories/employees to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS matrix identifying the GSA labor category titles, the occupational code, SCLS labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.

Company Profile

ABR, Inc.—Environmental Research & Services is a professional consulting group founded in Fairbanks, Alaska, in 1976. For over 40 years, ABR has performed objective science within the context of a triple bottom line business philosophy: 1) economic viability and innovation, 2) environmental stewardship, and 3) social responsibility. Today, ABR has a team of scientists and support staff in offices in Anchorage and Fairbanks, Alaska. Our mission is to provide timely, accurate, and cost-effective services to those who protect, manage, and develop natural resources.

ABR has undertaken more than 200 major projects in Alaska, ranging geographically from the western Aleutians to the North Slope, to old-growth forests in Southeast Alaska. ABR scientists have worked with the oil and gas, mining, and timber industries, electric utilities, federal resource agencies (USFWS, BOEM, BLM, NPS, USFS), state agencies (ADFG, ADNR, ADOT), local governments (NSB), Alaska Native organizations, universities (UAF, UAA), and research organizations (NSF) on projects in Alaska, Hawaii, and throughout the contiguous United States.
